

Parking Registration USER Manual

Overview:

1. Users open the application and enter their vehicle's license plate.
2. The user can also tick days they come into the office to be reminded for those selected days.
3. The entered license plate is stored for future use.
4. Users click "Submit" to initiate the automation process for parking registration on a specific website.
5. Selenium automatically completes the registration process, including logging in, selecting options, and entering the license plate and creating registration.
6. After successfully registering, it will show the confirmation of the registered vehicles in Aerosoft.
7. Daily notifications at 9: 30 will serve as reminders for parking registration.
8. The application also runs at startup of device, reminding user to sign in.
